February 25, 2022

Dear Mr. Brown:

In an effort to provide information to interested parties following a recent court ruling in King County regarding methamphetamine contamination, a list of cases with reported positive test results for methamphetamine has been posted to the Washington State Patrol Toxicology Laboratory Division's website: (<http://www.wsp.wa.gov/forensics/toxicology.htm>). The list includes cases with methamphetamine results reported from testing performed between March 1, 2018 – October 28, 2021, submitted from agencies statewide.

No reported test results have been recalled in relation to this issue. Please refer to the Toxicology Test Report for case specific information, including testing dates and reported results.

The most up-to-date Laboratory information on this topic is available on the Toxicology Laboratory Division's website. For additional questions, please contact the Laboratory ([toxlab@wsp.wa.gov](mailto:toxlab@wsp.wa.gov) or 206-262-6100).

Sincerely,

Elizabeth Gough  
Acting Toxicology Laboratory Division Commander
