Wanted persons

NOTE: For ACCESS files that were previously in both WACIC and NCIC and now are in NCIC only, there is NO change in the message key, header or transaction formats. These transactions will automatically be routed to NCIC. Responses from the new WACIC application may differ slightly in layout and data content from current responses. Please have your technical staff test all transactions to evaluate the impact on your regional system.

* Pawned guns and articles will be stored in WACIC, however an automatic query (QA / QG) to NCIC for a stolen gun or article will continue to be submitted.
