DRIVER/OPERATOR – TILLER

NFPA Standard 1002, 2017 Edition, Chapter 7

Test Construction Guide

At a minimum, the practical examination will include skills selected from each category with a total of 8 Skill Sheets selected. The Test Control Officer will randomly select the prescribed number of Skill Sheets per category using the matrix below. The exam should be set up using at least three stations, with a different certified Evaluator at each station. It is expected that appropriate PPE shall be worn for all stations unless otherwise indicated within the Skill Sheet.

Note: **Apparatus Equipment:** If the Test Apparatus being used does not have any components listed on the skill sheet (i.e. cable systems, locking pins for stabilizers, etc.) or listed equipment (i.e. on board generator) draw a line thru the skill step and write the word "**equipment**". This rule will be in effect as not all Aerial Apparatus are configured the same. This will not count as a failure for the candidate.

Driver/Operator Minimum Job Performance Requirements

Skill Sheet	JPR	Tasks	Minimum Selection Required: (for total of 8 Skill Sheets selected)
		Random Skills	
1.	7.2.1, 4.2.1, 4.2.2	General Skill Requirement: **Perform Preventative Maintenance Pre-Trip**	
2.	7.2.1, 4.3.1, 4.3.6	General Skill Requirement: **1. Drive a Fire Tiller Apparatus under normal conditions and 2. During a simulated Response**	
3.	7.2.1, 4.3.2	General Skill Requirement: **Driving Backing/Alley Dock Test**	**Select 4 Random Skill Sheets from this category**
4.	7.2.1, 4.3.3	General Skill Requirement: **Driving Serpentine**	
5.	7.2.1, 4.3.4	General Skill Requirement: **Driving Confined Space**	
6.	7.2.1, 4.35	General Skill Requirement: **Driving Diminishing Clearance**	
		Mandatory Skills	
7.	7.2.1, 7.2.2	Position and Stabilize aerial apparatus: **Maneuver and position an aerial apparatus; Stabilize an aerial apparatus**	
8.	7.23	Maneuver and Position aerial device from each control station: **Maneuver and position the aerial device from each control station**	**Select 4 Mandatory Skill Sheets from this category**
9.	6.2.4	Lower an aerial device using the emergency operating system: **Lower an aerial device using the emergency operating system**	
10.	6.2.5	Deploy and Operate Elevated Master Stream: **Deploy and operate an elevated master stream**	

DRIVER/OPERATOR – TILLER

Candidate Name	**Skill Sheet** **1**
IFSAC ID	**Date**

NFPA STANDARD: 1002, 2017 edition	**JPR:** 7.2.1, 4.2.1, 4.2.2	**SKILL AREA:** General Skill Requirement: **Perform Preventative Maintenance Pre-Trip**

TASK: The candidate shall perform, document, and complete daily routine tests, inspections, and servicing functions on specified systems and components so that the operational status of a fire department tiller is verified

CONDITIONS: Given a fire department tiller and the provided tiller vehicle inspection checklist, the candidate shall demonstrate the ability to: (Note: candidate may use sample checklist or AHJ's checklist)

PERFORMANCE OUTCOME: The ability to recognize system problems, correct any deficiency noted and use/inspect hand tools, with completed departmental forms, according to policies and procedures of Authority Having Jurisdiction.

No.	TASK STEPS	FIRST TEST		RETEST	
		Pass	**Fail**	**Pass**	**Fail**
1.	Inspect and walk around apparatus, ensure safe operation during inspection while looking for signs of damage or leaks	☐	☐	☐	☐
2.	Check the apparatus forms and documents for pertinent and current information	☐	☐	☐	☐
3.	Inspect and use hand tools on the apparatus	☐	☐	☐	☐
4.	Ensure the communication system is operable	☐	☐	☐	☐
5.	Perform and document the Aerial Device Apparatus Inspection Forms	☐	☐	☐	☐
6.	Check that stepping surfaces and hand rails are clean, secure, and in good working order	☐	☐	☐	☐
7.	Check batteries for fluid level, (if applicable) for corrosion, and tie downs	☐	☐	☐	☐
8.	Check braking system fluid level or air pressure, low pressure alarm	☐	☐	☐	☐
9.	Check coolant system for fluid levels, leaks, cleanliness	☐	☐	☐	☐
10.	Check electrical system, including warning devices, headlights, running lights, turn signals, and warning lights	☐	☐	☐	☐
11.	Check fuel level, must be kept at level according to AHJ	☐	☐	☐	☐
12.	Check hydraulic fluids for level and leaks (if applicable)	☐	☐	☐	☐
13.	Check engine oil for fluid level and leaks	☐	☐	☐	☐
14.	Check wheels, tires for air pressure and wear	☐	☐	☐	☐
15.	Check steering system for excessive play, in general should be no more than 10 degrees (about 2 inches) in either direction for tractor and tiller trailer	☐	☐	☐	☐
16.	Check engine belts for tightness and wear	☐	☐	☐	☐
17.	Check all tools, appliances, equipment, lighting	☐	☐	☐	☐
18.	Check windshield, wiper blades, and washer fluid level	☐	☐	☐	☐
19.	Start apparatus; monitor gauges and control devices	☐	☐	☐	☐

(CONTINUED ON THE NEXT PAGE)

DRIVER/OPERATOR – TILLER

NFPA STANDARD: 1002, 2017 edition	JPR: 7.2.1, 4.2.1, 4.2.2	SKILL AREA: General Skill Requirement: Perform Preventative Maintenance Pre-Trip				
20.	Recognize system problems; document and correctly report any deficiencies		☐	☐	☐	☐
21.	Check all exterior equipment for general condition		☐	☐	☐	☐
22.	Correct any deficiency noted according to the AHJ's policies and procedures		☐	☐	☐	☐
Overall Skill Sheet Score			☐	☐	☐	☐

NFPA STANDARD: 1002, 2017 Edition	JPR: 7.2.1, 4.3.1, 4.3.6	SKILL AREA: General Skill Requirement: **1. Drive a Fire Tiller Apparatus under normal conditions and 2. During a simulated Response**

TASK: Drive a fire department tiller safely over a predetermined route on a public way.

CONDITIONS: Given a fire department tiller and a predetermined route. **Note: Depending on AHJ, candidate will drive the tiller and AHJ provides a certified driver for the tractor or the candidate will test driving both tractor and tiller positions.**

PERFORMANCE OUTCOME: The candidate shall be able to drive a fire department tiller on a predetermined course.

NO.	TASK STEPS	FIRST TEST		RETEST	
		Pass	**Fail**	**Pass**	**Fail**
1.	Adjust and use mirrors for backing and moving apparatus	☐	☐	☐	☐
2.	Driver/passenger(s),using passenger restraint devices	☐	☐	☐	☐
3.	Four left turns and four right turns	☐	☐	☐	☐
4.	A straight section of urban street or rural two-lane road at least a mile in length	☐	☐	☐	☐
5.	One through-intersection and two intersections where a stop has to be made	☐	☐	☐	☐
6.	One railroad crossing	☐	☐	☐	☐
7.	One curve, either left or right	☐	☐	☐	☐
8.	A section of limited-access highway that includes a conventional ramp entrance and exit and a section of road long enough to allow lane changes	☐	☐	☐	☐
9.	A down-grade steep enough and long enough to require downshifting and braking	☐	☐	☐	☐
10.	An up-grade steep enough and long enough to require gear changing to maintain speed	☐	☐	☐	☐
11.	One underpass or low clearance bridge or obstacle	☐	☐	☐	☐
12.	Maintain safe following distances	☐	☐	☐	☐
13.	Maintain control of vehicle while accelerating, decelerating, and turning (given road, weather, and traffic conditions)	☐	☐	☐	☐
14.	Display ability to operate under adverse environmental or driving surface conditions	☐	☐	☐	☐
15.	Demonstrate proper use of automotive gauges	☐	☐	☐	☐
16.	Utilize emergency lights and siren	☐	☐	☐	☐
17.	Use defensive driving techniques	☐	☐	☐	☐
	a. Maintain safe following distances	☐	☐	☐	☐
	b. Maintain control of vehicle while accelerating	☐	☐	☐	☐

Candidate Name _____   **Skill Sheet** _____ **7** _____

IFSAC ID _____   **Date** _____

NFPA Standard: 1002, 2017 Edition	JPR: 7.2.1, 7.2.2	Skill Area: Operations: **Maneuver and position an tiller apparatus; Stabilize tiller apparatus**

TASK: Maneuver and position a tiller aerial apparatus, so that the apparatus is positioned for correct aerial device deployment. Stabilize a tiller aerial apparatus, so that power can be transferred to the aerial device hydraulic system and the device can be deployed.

CONDITIONS: Given a fully equipped fire tiller aerial apparatus, an incident location, a situation description, and an assignment, the candidate shall demonstrate the ability to:

PERFORMANCE OUTCOME: The candidate shall demonstrate the ability to: determine a correct position for the tiller aerial apparatus, maneuver tiller aerial apparatus into that position, and avoid obstacles to operations; and, transfer power from the vehicle's engine to the hydraulic system and operate tiller aerial apparatus stabilization devices.

No.	Task Steps	First Test		Retest	
		Pass	**Fail**	**Pass**	**Fail**
1.	Adjust mirrors before moving the tiller aerial apparatus	☐	☐	☐	☐
2.	Driver/passenger(s) using passenger restraint devices	☐	☐	☐	☐
3.	Determine a correct position for the apparatus.	☐	☐	☐	☐
4.	Position and maneuver the apparatus into the desired angle for optimal stabilization (as per the manufacturer's recommendation and/or AHJ policy).	☐	☐	☐	☐
5.	Perform "in-cab" procedures (as per the manufacturer's recommendation and/or AHJ policy).	☐	☐	☐	☐
6.	Check for overhead obstructions and ensure proper apparatus placement prior to deploying stabilizers.	☐	☐	☐	☐
7.	Properly position wheel chocks for the appropriate wheel(s) as per the manufacturer's recommendation or AHJ Policy.	☐	☐	☐	☐
8.	Determine the appropriateness of the ground surface for stabilizer deployment and ensure there are no obstructions to fully deploying the stabilizer on the working side of the apparatus.	☐	☐	☐	☐
9.	Stabilizer ground pads utilized for stabilization.	☐	☐	☐	☐
10.	Deploy the stabilizers and raise the apparatus to its working position (as per the manufacturer's recommendation and/or AHJ policy) – apparatus should be as close to level as possible according to using leveling indicators.	☐	☐	☐	☐
11.	Manual stabilizer locks utilized or (ensure internal locking mechanisms if applicable) are locked as per the manufacturer's recommendation and/or AHJ policy	☐	☐	☐	☐
12.	Recognition of reduced load chart capability should be identified (if applicable). Describe AHJ policy and procedures	☐	☐	☐	☐
13.	Fifth wheel or king pin locked Tiller (as per the manufacturer's recommendation and/or AHJ policy)	☐	☐	☐	☐
14.	Aerial device can be raised from the cradle	☐	☐	☐	☐

DRIVER/OPERATOR – TILLER

NFPA Standard: 1002, 2017 Edition	JPR: 7.2.1, 7.2.2	Skill Area: Operations: **Maneuver and position an tiller apparatus; Stabilize tiller apparatus**			
15.	Aerial device can be returned to the cradle and the apparatus returned to be ready for road travel.	☐	☐	☐	☐
Overall Skill Sheet Score		☐	☐	☐	☐
Candidate Stop Safety: Yes ☐		**Equipment Stop Safety: Yes ☐**

IFSAC ID _____ **Date** _____

NFPA Standard: 1002, 2017 Edition	JPR: 6.2.5	Skill Area: Operations: **Deploy and operate an elevated master stream**

TASK: Deploy and operate an elevated master stream so that the stream is effective and the aerial and master stream devices are operated correctly.

CONDITIONS: Given a fully equipped fire aerial apparatus, an aerial device, a master stream device, the candidate will demonstrate the proper procedures to safely raise the aerial device and position the waterway to flow _____ gpm using a _____ inch smooth bore nozzle/fog nozzle, _____ feet in elevation with the ladder extended to _____ feet in a defensive firefighting mode. The aerial operator must calculate and flow the correct pump pressure for the situation described. The candidate shall complete the following:

PERFORMANCE OUTCOME: The candidate shall demonstrate the ability to connect a water supply to a master stream device and control an elevated nozzle manually or remotely.

No.	TASK STEPS	FIRST TEST		RETEST	
		Pass	**Fail**	**Pass**	**Fail**
1.	Demonstrate how to attach a portable ladder pipe/hose line (if applicable)	☐	☐	☐	☐
2.	Demonstrate how to adjust pin-able waterway in the appropriate position (if applicable)	☐	☐	☐	☐
3.	Demonstrates how to manually rotate the nozzle from side to side, by remote station or manually	☐	☐	☐	☐
4.	Demonstrate how to manually raise and lower the nozzle by remote station or manually	☐	☐	☐	☐
5.	Demonstrate how to manually adjust the spray pattern of nozzle by remote station or manually	☐	☐	☐	☐
6.	Demonstrate how to change from a fog nozzle to a smooth bore tip with/without a stream straightener (if applicable)	☐	☐	☐	☐
7.	Connects to an adequate water supply to the proper water inlet (per manufacturers specifications and AHJ policy)	☐	☐	☐	☐
8.	Maneuver and position the aerial device toward the intended target engage pump if equipped.	☐	☐	☐	☐
9.	Smoothly open waterway discharge valve with minimal stress and movement of the aerial device and waterway	☐	☐	☐	☐
10.	Discharges the correct gpm for the assigned task at _____ psi pump pressure	☐	☐	☐	☐
11.	Monitors apparatus stability continually	☐	☐	☐	☐
12.	Maintains communication with water supply group or officer	☐	☐	☐	☐
13.	Smoothly closes waterway discharge valve with minimal stress and movement of the aerial device and waterway	☐	☐	☐	☐
14.	Disengages pump (if equipped)	☐	☐	☐	☐
15.	Close elevated master stream inlet valve and disconnect water supply from fire apparatus	☐	☐	☐	☐
16.	Opens waterway drain to drain waterway pipe completely prior to repositioning the ladder	☐	☐	☐	☐
17.	Retract, rotate, and lower aerial device	☐	☐	☐	☐

(CONTINUED ON THE NEXT PAGE)

NFPA STANDARD: 1002, 2017 Edition	JPR: 6.2.5	SKILL AREA: Operations: **Deploy and operate an elevated master stream**			
18.	Disassemble any portable ladder pipe, hose line (if applicable)	☐	☐	☐	☐
19.	Returns waterway pin to its stowed position (If applicable)	☐	☐	☐	☐
20.	If a different nozzle was selected for the evolution, return the proper nozzle (per AHJ policy) to the elevated master stream appliance (if applicable)	☐	☐	☐	☐
21.	Place the monitor to its correct stowed position prior to fully bedding the aerial device (if applicable)	☐	☐	☐	☐
22.	Properly bed the aerial device	☐	☐	☐	☐
23.	Prepare Aerial Apparatus for road travel	☐	☐	☐	☐

IFSAC ID _____   **Date** _____

NFPA STANDARD: 1002, 2017 Edition	JPR: 9.2.2	SKILL AREA: ARFF Operations: **Modulating with Fire Streams**

TASK: Produce a fire stream while the ARFF vehicle is in motion.

CONDITIONS: Given a fire department ARFF vehicle, a turret operator, and an aircraft mock-up as a target, the candidate shall properly modulate around the mock-up both forward and in reverse while applying a fire stream onto the mock-up, and continually monitor for potential problems.

PERFORMANCE OUTCOME: Produce a fire stream while the ARFF vehicle is in motion both forward and in reverse modulation, while continually monitoring for any problems.

No.	Task Steps	First Test		Retest	
		Pass	Fail	Pass	Fail
1.	Adjusts and uses mirrors, driver/passengers wearing seat belts (exception: turret operator)	☐	☐	☐	☐
2.	Engage fire/foam pump, determine correct position for the apparatus, and maneuver apparatus into that position	☐	☐	☐	☐
3.	Apply agent through a fire stream onto the mock-up (forward)	☐	☐	☐	☐
4.	Apply agent through a fire stream onto the mock-up (reverse)	☐	☐	☐	☐
5.	Monitors for potential problems and avoids all obstacles	☐	☐	☐	☐
6.	Candidate will describe and determine how long agent will be available based on flow rates	☐	☐	☐	☐
7.	All tasks are performed safely	☐	☐	☐	☐
Overall Skill Sheet Score		☐	☐	☐	☐

NFPA STANDARD: 1002, 2017 Edition	JPR: 9.2.3	SKILL AREA: ARFF Operations: **Producing Fire Streams**

TASK: Produce a fire stream from the internal tank, and a pressurized water source.

CONDITIONS: Given a fire department ARFF vehicle, a turret operator, an aircraft mock-up as a target, and a pressurized water source, the candidate shall produce a fire stream using the internal water tank and a pressurized water source, so that the pump is engaged, the turrets are deployed, the agent is delivered to the intended target at the correct rate, and continually monitor for potential problems.

PERFORMANCE OUTCOME: Produce a fire stream from the internal water tank, and a pressurized water source, while continually monitoring for any problems.
