Change Your Clocks and Check Your Smoke Alarms This Weekend

Olympia – This Sunday, November 6, 2022, marks the end of daylight savings time. The Washington State Fire Marshal's Office encourages you to check your smoke alarm when turning back your clocks.

Working smoke alarms are a key part of a home fire escape plan, and they save lives by cutting the risk of dying in a home fire by half. Last year in Washington State, approximately 85% of fire fatalities occurred in areas where smoke alarms should have been installed, and of that number, 30% of the smoke alarms were found to be present and operational.

Follow these guidelines for all home smoke alarms:

- Smoke alarms should be installed in every bedroom, in hallways outside bedrooms, and on every floor of the home, including basements. Large homes may need extra smoke alarms.
- Install smoke alarms that have strobe lights and bed shakers for those who are hard-of-hearing or deaf.
- Smoke alarms with non-replaceable 10-year batteries are designed to remain effective for up to 10 years from the manufacture date. If the alarms chirps, warning that the battery is low, replace the entire smoke alarm right away. Also, replace the smoke alarm if the manufacture date is more than 10 years old.
- Press the test button to ensure your smoke alarm is working properly. Also make sure everyone in the home knows the sound a smoke alarm makes and how to respond if it goes off.
- It is best to use interconnected smoke alarms. When one smoke alarm sounds, they all sound.
- Rental housing must also have working smoke alarms. Contact your landlord or property manager if your rental home does not have smoke alarms installed. Maintenance and testing of smoke alarms is the responsibility of the tenant.
- Contact your local fire agency for additional assistance. Many local fire agencies have smoke alarm programs that may provide free devices and installation.

For more information, contact the State Fire Marshal's Office at 360-596-3929.

###

The State Fire Marshal's Office is a Bureau of the Washington State Patrol, providing fire and life safety services to the citizens of Washington State. These services include public education, licensing and certification of the fire sprinkler, fireworks, and cigarette industries, data collection and analysis, fire and life safety inspections for state facilities, plan review of school construction projects, all-risk mobilization of statewide fire service resources, hazardous materials training, and training and certification of firefighters.
