Hello everyone!

I'm happy to say we're in the final stretch of this very long project! Last week we successfully completed User Acceptance Testing (UAT) with several FFLs to ensure things were ready before our last step, which is happening later this month: PILOT

In the pilot, we will finally 'flip the switch' and begin conducting background checks for a small number of FFLs (the same ones that helped with UAT). If all goes well, after about two weeks, we'll roll into the actual migration plan previewed in last month's email. The general plan is to go by county in one month long phases, based on the table below. There are those FFLs with multiple stores in multiple counties that will be handled 'all together', just to make it easy on them.

Please be watching your mailbox in the next few months for your official 'onboarding' letter that will provide you your secret code to register your business with SAFE.

We will also be sending out an email with the training presentation later this month as we get closer to starting the migration.

Thank you.

Kevin
