Subject: Extreme Risk Protection Order File - New NCIC File

Hello,

As part of the NIEM XML Migration Project and W3 enhancements, WSP has created a new Extreme Risk Protection Order (ERPO) File. We created the new ERPO File to align with the National Crime Information Center (NCIC). The ERPO File is in both WACIC and NCIC.

When will the ERPO File go live?

This file will go live on June 13, 2023. There will be an **ACCESS downtime on June 13th from 9AM – 1PM**. This will affect *all* ACCESS responses.

What is changing?

1. After go live, agencies must enter ERPO's into the ERPO File. The ERPO Forms will be available in Omnixx. If your agency uses a vendor managed regional system (Spillman, Tyler Technologies, Hexagon, etc.), please forward the attached technical specifications to your vendor if your agency wishes to add the ERPO Forms to your regional system. If your agency does not have an Omnixx terminal and would like one, please submit an [Additional ORI Request](#).
2. ERPO's will return on QW, QNP, and QV queries (see attached specification document starting on page 14 for more information). ERPO's will not return on a QPO – Query Protection Order.

What resources are available to my agency?

The ACCESS Section is currently working on finalizing the Extreme Risk Protection Order Chapter for the ACCESS Operations Manual. As soon as it is finalized, it will be posted to our [ACCESS webpage](#). In the meantime, see attached NCIC ERPO Chapter from the NCIC Operating Manual. We will also be posting a job aid to our ACCESS webpage – more to come!

Message Key Specific to WACIC

The SRPO – Serve Extreme Protection Order Form is specific to WACIC only. See page 18 in the technical specifications for more information. You will not find information in the NCIC Operating Manual relating to MKE/SRPO as it is a WACIC only MKE.

What if my agency already has ERPO's entered in the Protection Order File?

The WSP IT Department will be migrating (cancelling and re-entering) Protection Order records with the Record Type RTP/ERO (Extreme Risk) and RTP/TER (Temporary Extreme Risk) to the Extreme Risk Protection Order File. This means that the WAC and NIC numbers will change upon entry into the ERPO File. The records migrated into the ERPO File will come up for monthly validations within 60-90 days of entry. Our IT Department will contact your agency TAC with the new WAC's and NIC's. There is nothing your agency will need to do.

If you have any questions please feel free to email ACCESS@wsp.wa.gov

Thanks,

Violeta Navarro
