

ACCESS Section Managed IT Vendors

The Washington State Patrol ACCESS Section manages the below IT Vendors. WSP only handles the employee fingerprints, Security Awareness Training, CJIS Security Addendums, and conducts annual rebackground checks.

Company Names:

- AXON
- Brightwire
- CentralSquare
- CommSys
- DataMaxx
- Hexagon Safety and Infrastructure
- Image Source
- Karpel
- LexisNexis
- Motorola (formerly Spillman Technologies)
- Tyler Technologies (formerly New World)
- Peak Performance
- Reliable Admin Solutions
- GovCIO (formerly Salient)
- Northwest Open Access Network NoaNet (formerly TCS911)
- Vision MS
- WaTech
- Granicus (formerly WebQA)
- Westek Marketing

Additional Information:

- ❖ If your agency uses any of these vendors your agency *does not* need to complete a background check on their employees. To confirm if a vendor employee has been backgrounded, TACs can login to CJIS Online to verify their expiration date. If the vendor employee is not in CJIS Online, please email ACCESS@wsp.wa.gov.
- ❖ These vendors were added because they have contracts with multiple law enforcement agencies in our state. In efforts to streamline the process during audits ACCESS decided to manage these vendors.
- ❖ WSP ACCESS Section does not validate that these vendor products are compliant with the CJISSECPOL. This is up to your agency's IT to determine if requirements are met.
